MC, BR

We are sorry we were unable to make the past meetings concerning the Bus Barn Fuel storage. For the record we would like to oppose the amendment to revise 4d to allow an on site fuel storage tank. In the Decisions and conditions that the school district agreed to in order to get the bus barn put in at this location they agreed to No Fuel Storage. We live extremely close to this facility and can tell you first hand that several of these conditions are broken on a dailey basis. These are agreements already made. So you can see why we are skeptical of any new amendments. We feel the school district just waits until new people are on the planning and zoning and then they go back for anything that was previously denied. How much money is really being saved versus going to the Chevron. According to USA Today many companies that produce biodiesel are going out of business which is escalating the cost of this fuel. Is this the best way to spend our money with the teachers salaries being frozen how bad do we need a fuel storage center. We hope that you will really think about your decisions the school district is asking for something they promised they would not in order to have the bus barn built in the first place. The Bus Barn and Maintenance Facility has significantly changed our neighborhood. Please don't allow anymore noise and confusion to the mix.

Thank you for your time,

Bob and Sheila Goff

RE: BIODEGRADABLE STORAGE & DISPENSING TANK

I HAVE NO OBJECTION TO REZONING OR CONDITIONAL  
USE PERMIT. PROVIDING THERE BE A SCREEN

OF SOME KIND ON WEST SIDE / PREFER LANDSCAPING  
KIND.

I FEEL THIS IS A NECESSITY & CONVENIENT  
SITUATION AND A TIME SAVING FOR ALL.

SHOUD THIS BE APPROVED I SINCERELY  
HOPE THERE WILL BE A SCREEN, PROVIDED  
AS PROMISED.

Sincerely

Moya Ribbin
