| <input type="checkbox"/>            | Watercourse Alteration                            |                          |                 |                          |                  |
| <input checked="" type="checkbox"/> | Other <u>Construct berm to surround ice rink.</u> |                          |                 |                          |                  |

Attach to the application the following information where applicable. Plans in duplicate, drawn to scale showing the nature, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities; and the location of the foregoing. Specifically, the following information is required: (1) Mean sea level (MSL) elevation of the lowest floor (including basement) of all structures; (2) MSL elevation to which any structure is floodproofed; (3) certification by a registered professional engineer that the floodproofing methods meet the community floodproofing criteria; (4) a description of the extent to which any watercourse will be altered or relocated, and (5) base (100-year) flood elevation data for a development or subdivision.

The proposed development is located in the  Floodway  Floodfringe  
The Base Flood Elevation or depth number at the development site is: 52797
